

Pond Keeper®

POND BACTERIA - DISSOLVABLE PACKETS

Specifically Formulated for Ponds, Water Gardens and Fountains for Improved Water Clarity and Water Health

BENEFITS

- Easy to use
- Creates a clean clear pond
- Restores biological activity
- Breaks down excess fish food, fish waste, dead algae and other organic waste.
- Reduces ammonia and nitrogen levels
- Reduces odors
- Seeds biological filters
- Safe for fish, pets and people.

POND KEEPER beneficial pond bacteria products utilize specific strains of all-natural bacteria selected for their extraordinary ability to degrade organic waste commonly found in water environments.

These 1 oz packets can be applied in ponds that contain aquatic life, fish and plants and dissolve within minutes of application.

POND KEEPER should not be applied with algaecides. Any POND KEEPER application should be made 48-72 hours after an algaecide application.
